Fibo | Waterproof wall system

Innovative walls since 1952

Since 1952, we have combined our legacy of Scandinavian nature and style with our ability to consider limitations as our next chance to innovate. Fibo has delivered hundreds of millions of square feet over the years for wet rooms and other demanding rooms. Today, Fibo is the leading supplier of high quality waterproof wall panel systems, and can be purchased throughout Scandinavia,

Northern Europe, North America and New Zealand. We are creating interior technology for the future to come. We believe that the room of opportunity always is the most important room. Whether your challenges are of the technical, economical or the creative sort – Fibo will always find a smarter way to transform your wall.

*Invented, Designed
and Produced in Norway*

Residential Low Maintenance 'Age in Place' Shower

In September of 2019 this residential owner in Soap Lake Washington was looking to renovate an old bathroom to provide a low maintenance shower and bathroom with a contemporary look.

An 8 panel Cracked concrete Fibo wall panel kit with a matte finish was provided to update the look and eliminate grout joints from the old tiled shower. The remodeling contractor liked the time-effective laminate wall panel installation and the owner is enjoying not having to use a tile scrub brush ever again.

A simple to clean solid surface white matte shower pan with a custom drain location was used to eliminate the cost of moving the plumbing. Solid surface recessed niches and a corner bench seat also provide a simple to maintain – yet safe – bathroom.

“
Solid surface recessed niches and a corner bench seat also provide a simple to maintain – yet safe – bathroom.

Residential Homeowner

Advantages

- Easy to clean grout free shower wall panels
- A time-effective installation for a first-time contractor using the Fibo panels
- A contemporary, minimalist look with a cement-look

Client

A residential homeowner in Soap Lake Washington – project installed by a first-time installer of Fibo.

Product/Delivery

- An 8 panel Fibo wall panel kit in the Cracked Concrete 2204 F00 including adhesives and trim materials.
- 67" x 50" solid surface shower pan
- 40" x 80" glass block prefabricated shower wall by Innovate Building Solutions.

Affordable Single-Family Rental Housing

When your business model is to buy, fix and monetize affordable housing inside a city's core you need to find a cost-effective solution, but you need to get jobs done quickly so you can space leased.

This Pennsylvania-based project use 6-panel tub/shower alcove kits purchased 6 to 8 at a time so their field crews can quickly install multiple unit. Using a textured slate pattern provides a realistic stone look. The low maintenance benefits of the Fibo wall panels eliminate the hassles of this firm's maintenance staff cleaning grout joints when one tenant leaves and another one comes.

The brushed nickel shower panel system provides a wonderful compliment to the grout-free wall panels.

“

The brushed nickel shower panel system provides a wonderful compliment to the grout-free wall panels.

Residential Homeowner

Advantages

- High fashion stone-tile look helps affordable rental homes get leased fast.
- Easy to clean grout free shower wall panels
- A time-effective installation where several tub/showers can be done at once

Client

A boutique real-estate investment firm whose model is to buy, fix and monetize.

Product/Delivery

- Several 6-panel Fibo wall panel kits in the 1533 Gris Grande including adhesives and trim materials.

The four wall bath tub surround solution

This is actually a four wall installation.
The way the corners joined and finished
was amazing.

Installing Fibo can and will show imperfections in the actual
walls but making the right cuts in the right places can help hide
those imperfections even with a tile pattern as you see
in this photo.

“

*Much easier to install even in an application such as
we used it for in a four wall shower and seat combo!*

Euro-inspired Scandinavian Look Bathroom in the United States

After recent trips to Europe this California Architect decided it would be wonderful to surprise his son in Portland Oregon with a Euro-inspired bathroom.

Instead of doing the 'shower alcove enclosure only' (which is typical in the United States) – this customer wanted the low-maintenance, high-style look of a fully panels bathroom system with a large tile format look to make this small bathroom appear larger.

To create this motif a Transitional White high gloss 16-panel shower kit was selected in the Fibo Denver white 3091 M63 HG. To carry the Scandinavian minimalist look throughout the bathroom a wall hung vanity and toilet were used.

This California Architect decided it would be wonderful to surprise his son in Portland Oregon with a Euro-inspired bathroom.

Innovate Building Solutions

Advantages

- Large format tile look to make a smaller bathroom appear larger.
- The ability to DIY this installation with no prior experience.
- A Euro/Scandinavian inspired look

Client

A residential architect in California doing a DIY project for his son.

Product/Delivery

- 16 panel bathroom wall panel kit with adhesives and trims.

Low maintenance Spa-inspired shower in new construction United States

This Elizabethtown Pennsylvania couple had a challenge on their hands when designing and building their home.

When renovating their large master bathroom, they not only wanted a bright, inviting spa shower – but did not want to be forced onto their hands and knees to clean it. They went looking for a solution.

White Fibo click-lock-and-seal wall panels were chosen for not only their style, but their simplicity to maintain. To save money the couple chose to do this installation themselves.

A dark floor covering was chosen to provide a contrasting look to the modern white shower and white vanities. A vessel stand-alone tub was added for long-needed relaxation.

Advantages

- Simple to clean
- A white spa-inspired look using both large format horizontal tiles and vertical accent borders

Client

A residential do-it-yourself couple.

Product/Delivery

- A 9 panel kit including 4 panels of the Denver White 3091 M63 and 5 decorative white vertical accent borders of white slate 4091 ME88 SL.

“

This California Architect decided it would be wonderful to surprise his son in Portland Oregon with a Euro-inspired bathroom.

Local Homes, Walsall factory

Local homes who are owned by The Accord Group have a purpose built factory in Walsall producing pods.

Fibo's waterproof wall panel system has been used in a successful trial of kitchen and bathroom 'pod' installation in a modular building project. Local Homes, the low carbon modular builder for social housing, completed the steel-framed pods in its Walsall factory.

Fibo panels were fitted to the bathrooms and kitchens instead of ceramic tiles. The pods were then lowered by crane into each of the 14 homes in a development for housing organisation Accord at Bilston Road, Wolverhampton. Using the panels as a modern alternative to traditional tiles saved 15 days labour on the build.

As a modular build, products that were quick and easy to install were essential, but with no compromise on quality. Both panel designs – Grey Concrete in the bathrooms, White Silk in the kitchens – are Class 1 fire rated, meeting the safety requirements of the spec.

“

As a modular build, products that were quick and easy to install were essential, but with no compromise on quality!

ESTEC GmbH & Co. KG

The German company Estec has developed a new bathroom concept for apartments/condos to achieve a higher standard in their POD production with varying sizes of bathrooms.

The surface should be 100% watertight, have an esthetic appeal, be hygienic and easy to clean. The bathrooms from Estec will in the future come as POD's as well as finished wall elements.

Since the Fibo system was new to us, the Fibo team gave us excellent installation training doing our first test installations. We have had no problems with the Fibo system so far and with more experience we have also been able to optimize our installation process.

The result has been so appealing that we now are building larger volumes with the Fibo system.

“

*The Fibo system has been very well received by our customers.
We are very optimistic about using Fibo in future projects.*

Udo Scharr, Sales ESTEC GmbH & Co

Kundevurdering

- The product training as well as the general product quality are outstanding.

Fordeler

- The fact that the Fibo system is 100% waterproof as well as the quick installation
- The large range of designs have great esthetic appeal

Halton Housing/ Simply Modular

In Widnes, Simply Modular is building four apartments in a trial project for Halton Housing.

The objective is to show the value of modular buildings, and with four two-bedroom apartments to be completed in just 16 weeks, the rapid assembly Fibo wall panels and Kitchen Boards were the perfect choice for showers and walls above the kitchen counter.

The fast build time allowed Halton Housing to rent the apartments earlier, and showed the great potential for both Halton and social housing projects in general by doing so.

“

We used only tiles in the past because wall panels have generally not been up to the same quality. But Fibo wall panels turned out to be much better!

Allan Foster, Technical Director, Simply Modular

Client feedback

We used only tiles in the past because wall panels have generally not been up to the same quality. But Fibo wall panels turned out to be much better! They are absolutely superior in terms of the knowledge and time required to assemble them, while the quality is there along with a good selection of decors.

Advantages

- Rapid and easy assembly
- Good quality
- Many decor choices

Fibo

Fibo | Reference project

De Wit Chalets

When client's come by to have a look during the building process, we often get the following reaction: "Well, that's been grouted neatly".

People often don't even notice that they're not looking at regular tiles!

In 2012 we slowly started using Fibo. Back then we had quite a few doubts about applying wooden panels in wet rooms. Our clients would actually also rather stick to the more commonplace tiled bathrooms. On top of that we also couldn't find any financial benefit compared to regular tiles.

In 2014 we saw an increase in labor costs and partly because of that the difference between Fibo and traditional tile became smaller. Another benefit of Fibo was that one could walk away during the activities, to take up another chore. With traditional tiling this is not so easy, because you have to take into account the drying times of the materials. Yet another benefit of Fibo is that it can be applied dry and clean.

In regard to the available designs Fibo took a big step forward once the concrete designs were added to the collection. Now we can create fancy combinations, which allows us to offer Fibo in a higher segment. The appearance of for example Grey Concrete and Rough Copper gave a positive impulse.

“

A bathroom decorated with Fibo is less vulnerable during transport of the mobile homes, compared to traditional tiles which often crack or tear.

Peter Starreveld, Owner/Director, De Wit Chalets

Client feedback

When we speak to clients who have been living in their homes for a while already, we often hear that Fibo is such an easy product to clean. The service that RET Bouwproducten offers is simply great.

Advantages

- The possibility to "walk away" during the installation process, to get another panel
- Applied dry and clean
- A varied range of decors

Fibo | Reference project

AMOVEO

AMOVEO is a vertically integrated engineering, procurement, construction and development manager specialising in the end-to-end supply of modular solutions to the Australian construction Industry.

A vertically integrated engineering, procurement, construction and development manager specialising in the end-to-end supply of modular solutions to the Australian construction Industry.

“Several years ago, I was introduced to a waterproof wall panel system called Fibo. Fibo is developed and manufactured in Norway where it is used extensively as an alternative to ceramic tiles. Although initially sceptical, the concept of a panel system was very familiar due to my experience as a carpenter. I found working with Fibo very straight forward and was really impressed by the design of the locking tongue and groove. In no time it was easy to understand the benefits that wall panels offered over tiling.

As demand for new buildings grows in Australia, I see a need for greater efficiency in construction becoming a necessity. This will change construction methodologies with smart products like Fibo being used more frequently, as it is in other parts of the world. I have made significant career decisions on the strength of that belief and am working hard to see this become a reality. I believe that I can offer my clients better outcomes by choosing to challenge the ‘way things are’ and by trying hard to stay one step ahead of the crowd.”

Replacing ceramic wall tiling with Fibo resulted in a significant improvement to the efficiency and throughput of our production line. Fibo fundamentally changed for the better the way I consider the adoption of new materials and methodologies!

John Annear, Registered Builder, Amoveo Pty Ltd, Australia

Advantages

- Fewer trades required, which has meant that on some projects we no longer need Tilers.
- In a single application we can line, waterproof and finish a wet area wall, resulting in a reassignment of two bays to improve productivity.
- Time previously lost while waiting for membranes to cure, which represented a significant production risk during periods of high humidity, were no longer an issue.
- The ease and speed of fitting off fixtures without the need to pre-drill is a big productivity gain.
- For most fixings there is no need to noggin-out the frame as the Fibo panel easily supports robe hooks, towel rails, shower screen channels and toilet roll holders thereby reducing materials and weight
- **With Fibo we have far less in-transit damage compared to ceramic tiles, which can chip, pop out or crack.**

Client – AMOVEO Pty Ltd, Australia:

Modular production is managed via a series of sequential work ‘Bays’, whereby a module enters the factory at one end as a steel frame and leaves at the other as a part of an Australian building.

The production line consists of 12 Bays, where a defined set of tasks are completed before a module moves down the line. The ideal scenario is when production is scheduled so that all modules progress to the next bay at the same time. This means that the number of tasks and resources allocated along the production line are balanced.

Maat - Feeling home

We've been applying Fibo in our bathrooms for about eight or nine years now. Previously we used polyester boards and tiles for our bathrooms and toilets.

The main reasons why we switch are the improved production speed and the appearance. Fibo is an excellent alternative for ceramic tiles, which in our field of business (mobile home building, wood construction), has proven to be a difficult process.

When we started using Fibo we had quite some doubts about applying wooden panels in a wet room. After a while though, we gained trust in the product. Nowadays we apply Fibo in all our bathrooms, and we do so with full satisfaction. Compared to polyester, which we used to apply a lot, Fibo has a much nicer appearance.

The reaction of our clients is mostly astonishment, because they initially think Fibo panels are real tiles, until they touch them. People are always enthusiastic, especially when they realize maintenance is much easier compared to ceramic tiles.

“

Cafè Gaflen

Cafè Gaflen is situated by the beach in Jylland's idyllic Hvide Sande, Denmark.

It was built by a married couple who had first tested Fibo wall panels for one month at a large kitchen – to find that it was easy to clean and maintained its integrity.

So they decided to use Fibo everywhere in their new café – in the public area, in the kitchen and in all restrooms. In total this meant more than 400 square meters.

"It was difficult to choose decors and colors because there are so many different variants. But it gave us the opportunity to use many different expressions in the café's decor," said the café owners.

“

The carpenter said that the panels were easy to work with!

Trine and Carsten Davidsen, Cafè Gaflen

Client feedback

–The carpenter said that the panels were easy to work with. It looks good, is easy to clean and maintenance-free, and the customers think it's cool that we've built in a somewhat raw style.

Chiseldon Nursery, Swindon

Swindon Borough Council really took advantage of the opportunities provided by Fibo wall panels for its new kindergarten in Chiseldon, Swindon.

The many different decors and color choices made it possible to give each of the seven rooms its very own expression, to the joy of both children and adults.

As first-time users, Swindon Borough Council was pleasantly surprised at how much easier wall panels are to install compared to tiles. Fibo wall panels are available at full height and are assembled directly on existing walls or support; they click together and reduce the need for extra workmen.

Their experience from the kindergarten was so good that Swindon Borough Council later decided Fibo should be used in the renovation of Chiseldon Primary School.

“

This was the first time we used Fibo wall panels and we were very impressed!

Paul Foggio, Construction Manager, Swindon Borough Council

Client feedback

This was the first time we used Fibo wall panels and we were very impressed! The wall panels required much less groundwork than tiles, are environmentally friendly, durable, easy to clean and require little maintenance. With rapid and easy installation as well, they delivered in absolutely all areas.

Fibo

Fibo | Reference project

Broxtowe Borough Council

Considerations for those with dementia were an important reason that Broxtowe Borough Council chose Fibo wall panels for their adapted housing.

Dementia experts recommended using contrasting colors to make orientation easier, and Fibo's Colour Collection offers a range of exciting colors and decors.

In addition, Fibo wall panels are very easy to clean, which was also a criterion since many of the residents have impaired functionality.

“

Installation of the wall panels went both rapidly and easily, and they require a minimum of maintenance.

Howard Draper, Broxtowe Borough Council

Client feedback

- This was the first time we used Fibo wall panels as an alternative to tile, and we are very satisfied with the result. Installation of the wall panels went both rapidly and easily, and they require a minimum of maintenance. Fibo gave us very good help throughout the project, so we are definitely going to use Fibo wall panels again.

Advantages

- Contrast colors for those with dementia
- Easy cleaning and maintenance
- Rapid assembly
- Cost effective

Client

Broxtowe Borough Council

Listenheim Nursing Home

Fibo wall panels was selected for all bathroom walls when the Listenheim nursing home was upgraded and built in fall, 2018 and winter, 2019.

The new building houses 32 living quarters and common areas, a daytime center and administration offices. The project made use of Fibo wall panels in a combination of Colour Collection and White Silk from the Legato collection.

To ensure a rapid and correct assembly of the panels, Fibo arranged a special course at the building site before start-up.

“

Good quality and flexibility inherent in the many decor opportunities.

Birgit Birgitte, Manager at Listaheimen

Client feedback

Kruse Smith meant both the quality of the products and the follow-up they received through the project was very good.

Advantages

- Good quality
- Easy assembly
- Flexibility inherent in the many decor opportunities

Client

The Hilltop Community Center

Prestige Property Maintenance Marlow Ltd (PPMM) builds and maintains properties for both private persons and professional players.

When upgrading the toilets at The Hilltop Community Center in High Wycombe, the old tiles were replaced with Fibo wall panels in various tile designs.

The wall panels gave the toilets a more modern look, while making them easier to clean. Rapid assembly and a shorter renovation period minimized the inconvenience for users along the way.

“

They were just the ideal choice for Hilltop. While tiles require more groundwork, the Fibo wall panels can be assembled directly on existing walls or support.

Penny MacColl, Director, PPMM

Client feedback

The wall panels are easy to install, easy to keep clean, nice looking and have a quality that lasts. The tiles they had were both outdated and in poor condition. The new wall panels have a modern look, more like a boutique hotel, and would have looked fine in any bathroom.

Advantages

- Modern design
- Rapid and easy assembly
- Easy cleaning and maintenance
- 15-year warranty

Housing, Powys County Council

Powys County Council received a lot of negative feedback on the bathrooms from its tenants, relating to old and worn tiles that were difficult to maintain.

They therefore offered Fibo wall panels as an alternative when they began extensive renovations.

The feedback from the residents was good: Without grout where dirt accumulates, the Fibo wall panels were easier to clean and maintain.

For the authorities, there was also a big gain in faster installation, where the new wall panels were finished in one day compared to the two or three days it took for tiles. In addition, there were also ideal decor variants for tenants who suffered from reduced vision and dementia.

“

Since we started using Fibo wall panels, the feedback has improved: Residents confirm that they are much easier to clean.

Mike Jarrett, WHQS Contracts Officer, Powys Council

Client feedback

Many of our tenants were dissatisfied with the tile, typically because they were difficult to maintain, were unsightly and detached from the wall. But since we started using Fibo wall panels, the feedback has improved: Residents confirm that they are much easier to clean.

Advantages

- Easy cleaning
- Durability
- Rapid assembly

Modern Home, Jæren

The Vold family wanted a functional home, adapted to their active family with large, good rooms when in 2016 they were ready to build a new home with a view over Jærlend.

They found a solution in a modern house from BoligPartner with lots of light, large windows and efficient, stylish surfaces.

The choice fell on Fibo wall panels for the house's laundry room and two bathrooms. Both bathrooms were clad in white wall panels combined with darker contrast panels used inside the shower.

In the laundry room, a completely plain panel in a modern gray color was used.

The design opportunities together with easy cleaning and high durability were important for the family. Many leisure activities mean frequent changes of clothes and a lot of showering – and the walls must withstand this.

“
Both bathrooms and the laundry are in daily use and happily, we chose Fibo which withstands this and only needs easy cleaning.

The Vold family

Client feedback

–We've lived in our new home for almost a year now, and are very pleased with the choice of Fibo wall panels. Both bathrooms and the laundry are in daily use and happily, we chose Fibo which withstands this and only needs easy cleaning.

Student housing, Trondheim

Studentsamskipnaden in Trondheim builds and operates housing for the city's many thousand students.

Here, they can choose among everything from a room in a collective to 4 room apartments, small single houses in the country side or apartment buildings made of solid wood.

Studentsamskipnaden has three criterias for kitchen panels: Rapid assembly, easy cleaning and that they can withstand a blow or two. With so many users and a high turnover of residents, there is an extra requirement for durability – something that has made the operations department come up with the expression “student approved” to designate exceptional durability.

They get this quality with Fibo wall panels. At the same time, they keep costs down since the assemblies can easily be done by a carpenter or other kitchen assembly person who is nonetheless there, without the need for further professionals.

“

*Our three criterias for kitchen panels:
Rapid assembly, easy cleaning and that
they can withstand a blow or two.*

Trondheim Studentsamskipnad

Client feedback

- The cleaners have commented that Fibo wall panels are easy to clean, without the usual problems with grout where dirt gathers.
